

## 4G LTE Backup

**4G LTE Backup provides a fail-safe solution for uninterrupted network connectivity.**

Business-critical applications rely on your network. Even a short disruption in internet service could result in lost revenue, dissatisfaction, and reduced productivity. Glo Fiber Enterprise's 4G LTE wireless backup service add-on will ensure your business stays connected in the event of a power outage, construction projects, or any other unforeseen occurrence.

Glo Fiber Enterprise uses an affordable pre-configured enterprise-grade failover router that is ready to be dropped right into your network with no additional set-up required. The solution has always-on access to the 4G-LTE network, which will automatically switch on if the primary network fails.\*

\*Some customer LAN configuration may be required.

\*\*Only available where 4G LTE service is available. Must have Glo Fiber Enterprise DIA/WAN service.

### About Glo Fiber Enterprise

Our parent company, Shentel, has been in this business for roughly 120 years. Our advanced fiber network is built to ensure you keep pace with the ever-changing demands of our connected world.
